COHESIVE PERFORMANCE

We understand that when it comes to luxury outdoor kitchens and patios, both cabinets and countertops need to meet demanding aesthetic and functional requirements. Danver™ stainless steel outdoor kitchens and Lapitec® sintered stone countertops have been designed and tested to withstand harsh outdoor elements from Canadian snow and ice to desert heat and sun.

COHESIVE DESIGN

As we know, cabinet construction is vital to any outdoor kitchen, and is why Danver stainless steel cabinets are specifically engineered for outdoor use. Countertop material selection is crucial for a complete solution, which is why the Danver team recommends Lapitec sintered stone as their countertop of choice.

**Lapitec** - Made with 100% natural minerals, UV-stable, through-body veining and color, workability of natural stone, and fully recyclable.

**Danver** - Made in the USA and fabricated from stainless steel, these kitchens have been instrumental in bringing color, style and design to the outdoors. Available as Danver Stainless Outdoor Kitchens, Brown Jordan® Outdoor Kitchens and Trex® Outdoor Kitchens brands.

LAPITEC® vs. GRANITE

	Lapitec®	Granite
Hardness	●●●●	●●●
UV stability	●●●●●	●●●
Heat and freeze stability	●●●●●	●●●
Flame resistance	●●●●●	●●●
Stain resistance	●●●●	●●
